EXECUTIVE SUMMARY

1.REDEFINED PROBLEM STATEMENT

Jar has made saving effortless through its **passive**, “set-and-forget” model, but this same simplicity limits active **engagement** among its core Gen Z and student users. As users have little reason to return beyond occasionally checking their savings, Jar risks becoming invisible in the user’s daily financial life.

The **challenge** is to create meaningful reasons for users to actively return 2–3 times a week, while preserving the **effortless saving** habit that makes the product successful and create deeper customer relationship

2.STRATEGY

Introducing a **5-tier**, **EXP**-based privilege system to encourage consistent user engagement.

- **Five Tiers:** Each tier offers unique **benefits** and **privileges** as users progress.
- **EXP Mechanism:** Users start with **zero** EXP and earn points through meaningful interactions within the Jar ecosystem.
- **Progression & Rewards:** Accumulated EXP enables users to advance through tiers and unlock exclusive benefits, motivating them to **engage** with Jar more frequently.

3.TARGET

Target **Gen Z** and **student** users by encouraging them to return to Jar **2–3 times** a week through meaningful interactions, visible savings progress, and a **five-tier** privilege system that rewards consistent engagement and unlocks exclusive benefits.

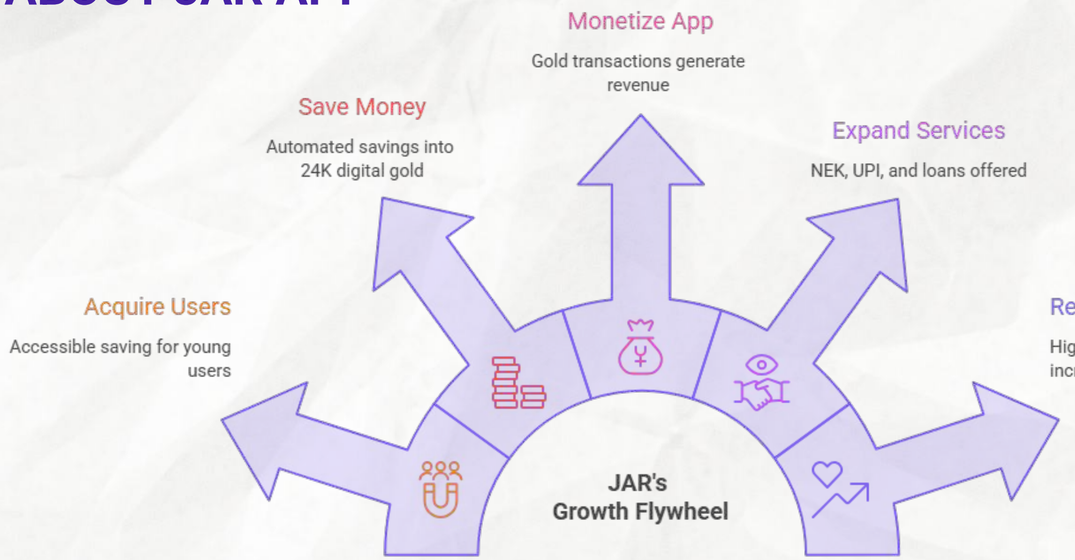

4.IMPACT

- Increase Meaningful Weekly Active Savers (**MWAS**)
- Improve **weekly retention** and build stronger long-term user relationships.
- The tier-based system aims to make Jar a more engaging part of users’ financial routines while preserving its effortless, **passive saving** experience.

WHAT IS “SILENT SAVING” ?

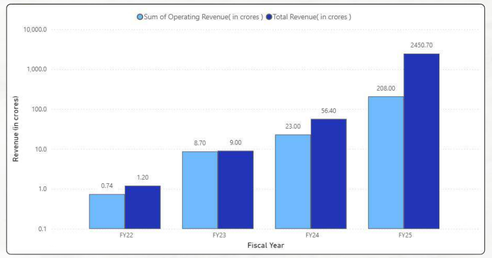

Jar turns small, everyday amounts into savings automatically, reducing the need for users to consciously decide when and how much to save.

COMPETITORS

1.Gullak		Gold savings, auto-save, minimum amount, redemption
2.OroPocket		Gold/silver, auto-investment, features, user experience
3.Paytm Gold	paytm	Distribution, trust, convenience, gold + other financial services
4.PhonePe Gold	PhonePe	UPI integration, accessibility, digital gold

ROOT CAUSE & USER JOURNEY

MECE ISSUE TREE

LOW ACTIVE ENGAGEMENT

VALUE

APP DOES NOT FEEL USEFUL ENOUGH IN BETWEEN SAVING

- Little to discover beyond balance checks
- Saving happens automatically (without user action)
- Limited personalized insights or financial value.

MOTIVATION

LACK OF A STRONG EMOTIONAL OR PERSONAL REASON TO REOPEN THE APP

- Progress towards goals is not visible
- No rewards or recognition for consistency
- Achievement or financial growth feel intangible

TRIGGER

FEW TIMELY OR CONTEXTUAL CUES TO BRING USERS BACK TO THE APP

- Few contextual cues to revisit the app
- Limited timely reinforcement of progress
- Few moments that prompt action

HABIT FORMATION

THE APP DOES NOT BECOME A PART OF THE USER ROUTINE

- No recurring reason to check in
- Saving requires no active participation
- No reinforcement that builds repeat usage

USER PERSONA

Sourav Yadav

Age : 19

Mumbai

Student

Wants to save money with minimum effort and time.

GOALS

- Save money effortlessly with minimal time and effort.
- Build a consistent saving habit without compromising daily expenses.
- Track savings progress and see tangible results over time.
- Earn rewards and unlock benefits for maintaining saving habits.

PAIN POINTS

- Limited pocket money makes it difficult to save consistently.
- Busy academic schedules leave little time to manage finances actively.
- Traditional saving methods require conscious effort and discipline.
- Small savings feel insignificant, making it hard to stay motivated.

USER JOURNEY

1.USER ACTIONS

Users earn EXP by performing meaningful actions within the Jar ecosystem

→

2.EARN EXP

Each eligible action gives the user a predefined amount of EXP

→

3.PROGRESS THROUGH TIERS

Once a user reaches the required EXP threshold, they automatically progress to the next level

→

4.UNLOCK BENEFITS

Each new tier provides additional benefits and privileges

TIER-BASED PRIVILEGE SYSTEM

WHAT IS TIER-BASED PRIVILEGE SYSTEM ?

A Progressive loyalty and engagement structure where users move through **five levels** based on their continued saving activity and **meaningful engagement**.

As users progress, they unlock additional **benefits** and **privileges**, giving them increasing value for staying active.

CORE CONCEPT

EXP-Powered Progression :

Every meaningful interaction with Jar earns "**EXP**". As users accumulate EXP, they progress through 5 tiers and unlock increasingly valuable benefits.

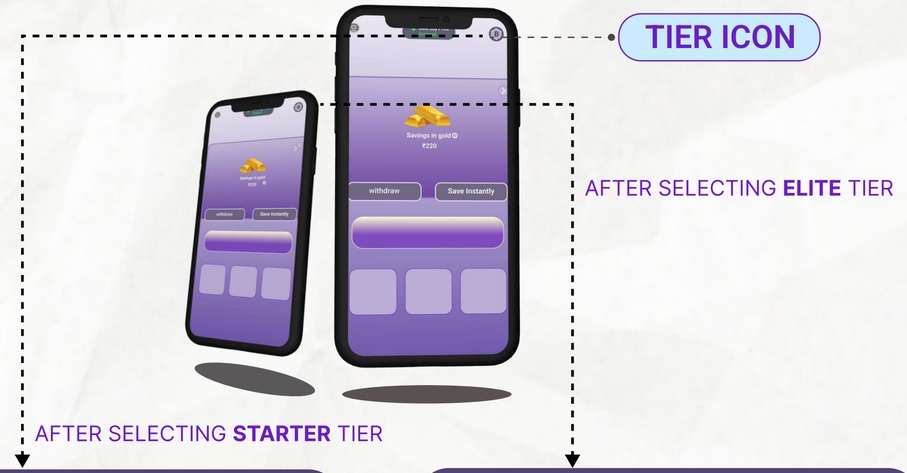

HOW TO INCREASE EXP ?

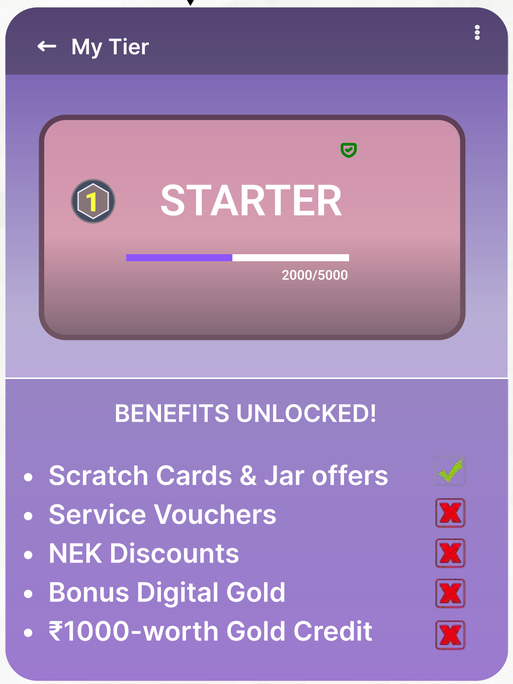

- Daily Log in → 200 EXP
- Daily Spins → 50 EXP/- Spin
- Gold Purchase → 5 EXP per ₹1

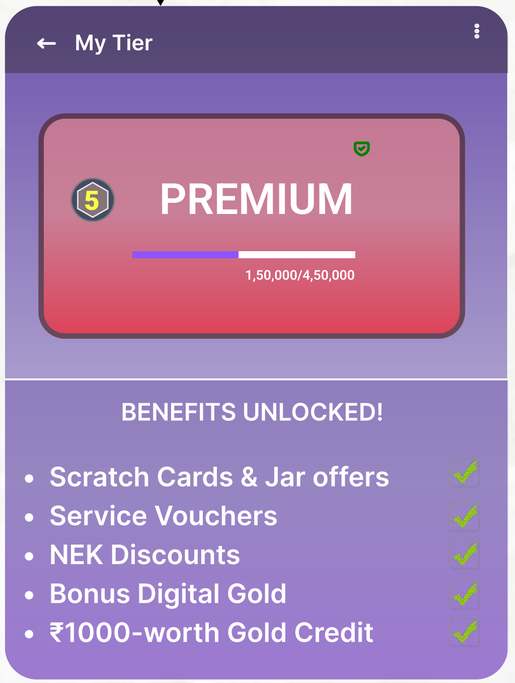

EXP DISTRIBUTION AND EXPECTED USER RETENTION

TIERS	STARTER	SILVER	GOLD	PLATINUM	PREMIUM
EXP NEEDED TO COMPLETE TIER	5000 XP	40000 XP	100k XP	220k XP	450k XP
EXPECTED LOG-IN (days)	7(1 week)	60(2 months)	180(6 months)	365(1 year)	730(2 years)

USER INTERFACE

TIER-WISE BENEFITS

Tier-Based Privilege System

Receive small Jar-only offers, **scratch-card rewards**, or occasional micro-vouchers.

Silver Tier

Access **vouchers** from partner services including food, OTT, mobility, and travel.

Gold Tier

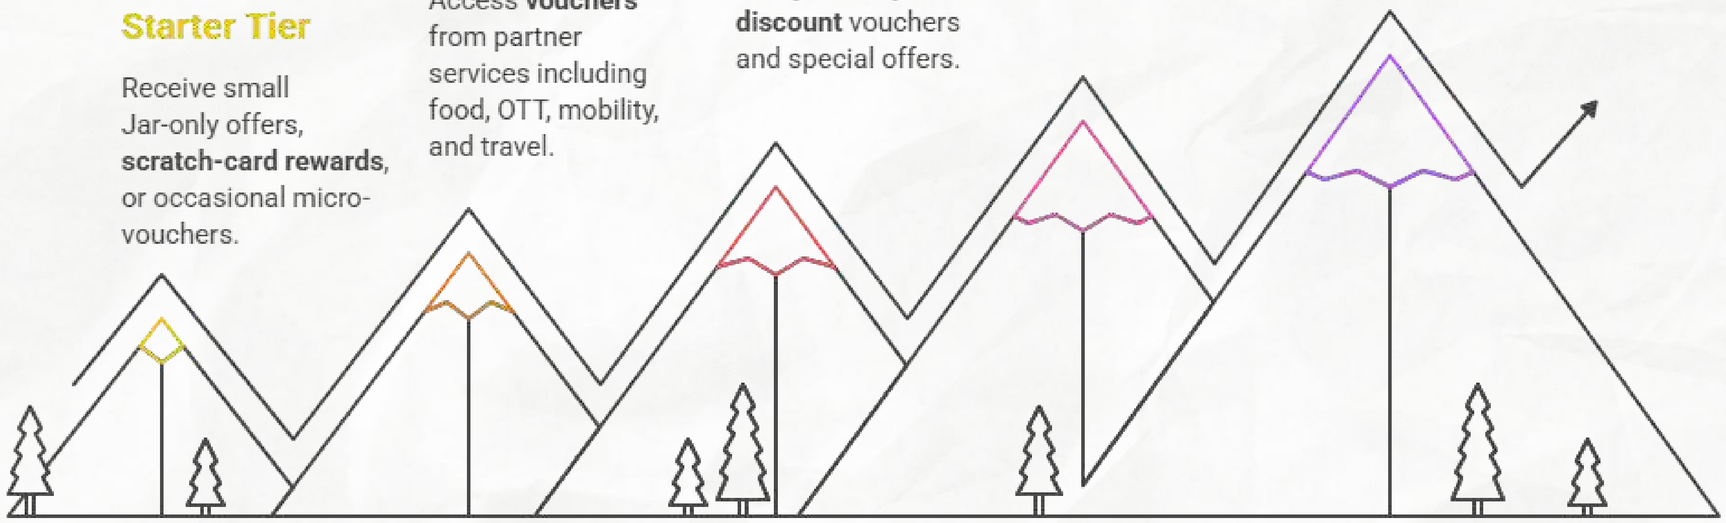

Gain exclusive **NEK jewellery discount** vouchers and special offers.

Platinum Tier

Earn bonus Digital Gold on reaching **savings milestones** like ₹100–₹250 per month.

Premium Tier

Achieve ₹15,000+ **cumulative** Digital Gold investment over 30 days to receive **₹1,000 Digital Gold or a flagship offer**.

TIER	FEATURES				
	F1	F2	F3	F4	F5
STARTER	✓	✗	✗	✗	✗
SILVER	✓	✓	✗	✗	✗
GOLD	✓	✓	✓	✗	✗
PLATINUM	✓	✓	✓	✓	✗
PREMIUM	✓	✓	✓	✓	✓

F1 : Scratch Cards & Jar offers

F2 : Service Vouchers

F3 : NEK Discounts

F4 : Bonus Digital Gold

F5 : ₹1000-worth Gold Credit

SOLUTION VALIDATION

Average of 20 and 40

ESTIMATED DAILY EXP PER PERSONA

CALCULATION

Assumption : Avg students can save **20-40 INR** per day ie. **600-1200 INR** per month

We have taken **600** EXP/day as a reference and calculate EXP point system

Total EXP = (Log in) + (5 X Spins) + (Avg Gold Purchase)

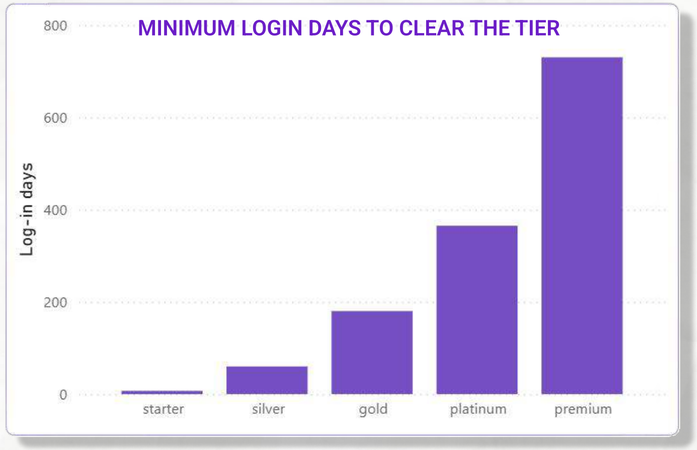

= 200 + 5X50 + 30X5 = **600 EXP**

CUSTOMER ENGAGEMENT FUNNEL

IMPACT

1.INCREASED LOGIN

Assumption : Gen-z students save on an average **30 rupees** per day.

1.Daily Engagement Triggers

Daily EXP rewards and spins give users a recurring reason to revisit the app.

Impact: Increased login frequency

2. Progress-Driven Motivation

Visible EXP tracking and upcoming tier milestones encourage users to return and track their progress.

Impact: More repeat visits and meaningful interactions.

3. Reward-Based Retention

Exclusive benefits and higher-tier privileges motivate users to stay engaged with Jar over time.

Impact: Improved user retention and weekly active users.

2.INCREASED CROSS-SELL

Higher Product Discovery

Tier-based rewards expose users to partner offers, financial services and additional Jar products as they progress.

IMPACT :
Increased product awareness and exploration.

Incentivized Trial & Adoption

Exclusive vouchers, discounts and bonus gold encourage users to try relevant products and services unlocked at higher tiers.

IMPACT :
Higher trial rates and potential cross-sell conversions.

Higher Customer Lifetime Value

Continued engagement and personalized tier benefits create more opportunities to convert active users into repeat customers across Jar's offerings.

IMPACT :
Potential growth in cross-sell revenue and customer lifetime value.

NORTH STAR METRIC

Meaningful Weekly Active Savers (MWAS)

$$\text{MWAS} = \frac{\text{Users with ≥2 meaningful interactions along with active saving}}{\text{Total active saving users}}$$

A meaningful interaction could be :

- Checking progress toward the next tier
- Redeeming a tier benefit
- Completing a savings challenge
- Viewing savings/gold insights
- Taking an action that contributes toward the next tier

SUPPORTING METRICS

$$\text{Tier Progression Rate} = \frac{\text{Users jumping tiers within a period}}{\text{Total Users}} \times 100$$

$$\text{Weekly Active Users (WAU)} = \frac{\text{Unique Users}}{\text{Week}}$$

$$\text{Retention Rate} = \frac{\text{Users at end of a period - New Acquired Users}}{\text{Users at Start of the period}} \times 100$$

$$\text{Churn Rate} = \frac{\text{No. of lost customers in a period}}{\text{Total customers at start of the period}} \times 100$$
