

ShaSang A.I Growth Strategy

**RAJAT SARKAR
(24JE0517)
IIT(ISM) DHANBAD**

➔ USER Persona

Karan Negi

JEE ASPIRANT

- 17
- Student
- Assam, India
- CBSE Student

User Needs

JEE amplitude tests with detailed solutions

User Mindsets

They strive to get a real "ENTRANCE-LIKE" test experience, where JEE PYQs will be asked and the format will be same as the JEE EXAM.

USER FLOW

User searches for JEE practice test in browser.

Clicked Shasang AI

Explored the site and found the "JEE section"

Pain Point

User have to explore a lot to find a simple test.

Started the TEST

Set the parameters for the test

➔ Redefined Problem Statement

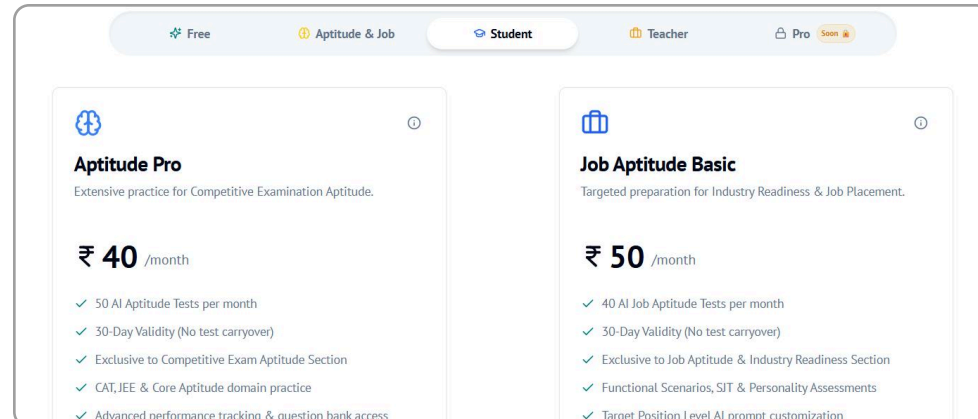

Design a zero-cost or very low-cost, high-impact organic distribution strategy to acquire 5,000 new customers for ShaSang A.I.

➔ Objectives

- 5000+ New Users
- Increase Retention rate
- Increase NPS

UI/UX Improvements

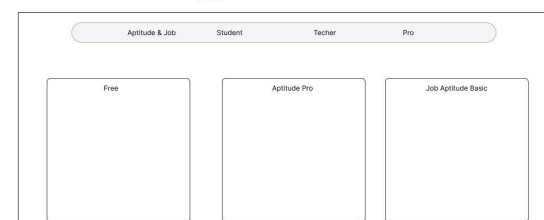

1

➔ Pain points & Solution

- Instead of having a separate "Free" section in the pricing, we can add Free option in each sections (Aptitude & job, Student, Teacher, Pro)
- Because it will Allow USERS to **compare** different plans with the **Free plan**, which will be more convenient from user perspective.

Suggested Wire Frame

- Users can easily **COMPARE** the prices among different Subscriptions.
- We can also add option of 3-month/quarterly and Yearly plans

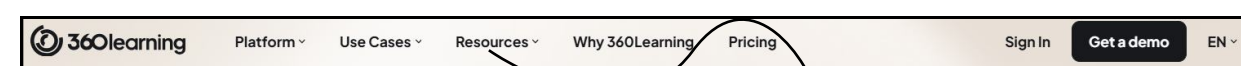

2

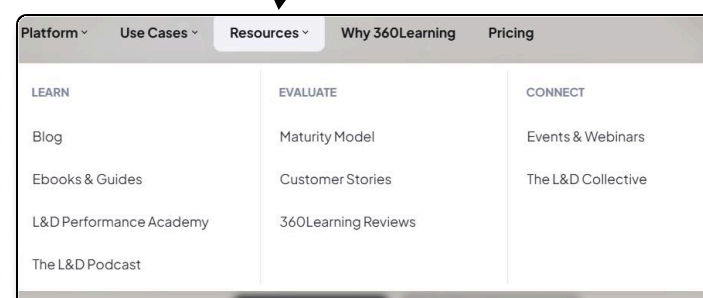

➔ Pain points & Solution

- The **NAVIGATION BAR** looks too much simple only having the **DASHBOARD** (which is also of no use).
- Users** will face difficulties in finding any particular section. eg. one want to give a JEE practice test, they have to navigate the whole website to find where can he/she give the test

➔ Design suggestions (Top competitors)

- Creating a DETAILED navigation menu helps **Users** to explore all the features of the website and gives a better **USER EXPERIENCE**.
- Without Navigation Section, the website looks **unorganized** and **unprofessional**.
- Having a navigation menu also increases product transparency and user **Engagement**.

Before  After 

➔ Metrics

Average Session Duration:

Measures the total length of time visitors interact with your site divided by the total number of sessions.

Net Promoter Score (NPS) :

Measures customer loyalty, promotion and satisfaction on a scale from 1 to 10

➔ **Objective :** 5000+ New Users

- So I will not tell you to do correctly the **SEO**(search engine optimization), which is so obvious .

Then what ?

SAI COINS

a new feature !

What are SAI COINS ? €

SAI coins are bonus points which can gained by doing any of the tasks in the Shasang AI website and which can be used for experiencing other features .

eg. a user attempted a test , he/she will get some coins.

Idea Breakdown

DISCLAIMER

“SAI coins” is just a generic name , the original FEATURE name could be anything as per the company's convenience.

STRATEGY : METHOD OF IMPLEMENTATION

- we will launch this feature in every section(like for teachers, students, executives...).
- Each task they in the website will receive some coins .
- we should **limit** some of the features so that if someone have finished their *daily/weekly limit , they can have an use those coins .
- But the amount of coin one can earn per day should be limited , thus it will be both **user** centric as well as **business** .
- There should a referral program also , where one will get SAI coins by sharing it with their friends.
- There should be some joining bonus coins also.

ADVANTAGES OF THIS FAETURE

1. Higher Overall Engagement .
2. Higher net Promoter Score (NPS).
3. Better user experience through implementing a proper Navigation Menu.
4. Higher Retention Rate through **SAI Coins(will be explained in next slide)**

INCREASING RETENTION RATE IDEAS

- We can conduct some daily missions :
eg. some one who complete 10 tests(or any other task) gets bonus coins , which will increase **DAU** for sure
- Make a monthly leaderboard (eg. like unstop) for shasang Score where users can see their rank in their region and they could compete with their friends.
- Just like the daily missions , we can conduct some monthly events features some tasks and top 3 scorers will get 1 month Shasang AI subscription for FREE.

THANK YOU
